Directory

Water Association Of Kern County

Who's Who In Kern County Water

The Water Association of Kern County would like to present the 2008-2009 edition of Who's Who in Kern County Water. The Water Association publishes this directory each year as a public service. Information concerning our water supply and the water districts responsible for its management, is contained here for your use as a handy reference.

The Water Association has been an active part of the community since its official founding in 1955. The mission of the Association is to provide up-to-date and understandable information regarding all aspects of water, its development, use, and availability. We all depend on water for health, recreation, power generation, and irrigation for our many agricultural crops.

It is important to understand how we get it, manage it, bank it, and conserve it. That's the story we attempt to tell through publications like this and other public information events.

The Water Association is a non-profit business association, which is funded by voluntary memberships and grants from organizations and individuals interested in the economic, recreational, and conservation benefits of sound water management and development. Membership is open to anyone wishing to support the educational efforts of the Association in this important endeavor.
